### Substrate 快速入门与实战

讲师: Bryan

# 第四节课

### Substrate Kitties V2 实现

#### 设计

- Storages:
- Kitties: map u32 => Kitty
- KittiesCount: u32
- OwnedKitties: map (AccountId, u32) => u32
- OwnedKittiesCount: map AccountId => u32
- Dispatchable methods:
  - create()
  - breed(kitty1: u32, kitty2: u32)

- 数据结构:
  - struct Kitty
  - dna: [u8; 16]

## polkadot.js

### polkadot.js

- Parity写的Substrate & Polkadot 的JS SDK
- 功能非常完善
- Typescript, RxJS
- polkadot apps
  - Substrate & Polkadot 前端
  - React

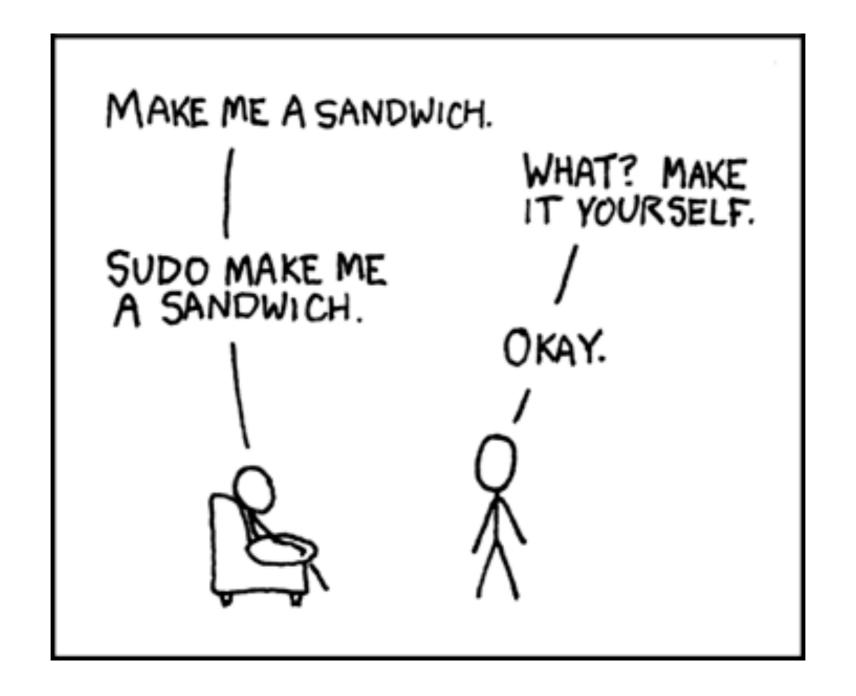

### polkadot.js

- 创建项目:
- Fork <a href="https://github.com/polkadot-js/apps">https://github.com/polkadot-js/apps</a>
- 创建新模块
- https://github.com/polkadot-js/apps/tree/master/ packages/app-123code

## srml-sudo 代码分析

#### srml-sudo

# 作业

### 作业

- 重构 create,使用新的帮助函数
- 完成 combine\_dna
- 设计加密猫模块 V3

### 作业

- V3需求
  - transfer kitty 转移猫
- 要求复杂度必须优于 O(n)

### 额外作业

- 创建新的polkadot apps项目
- 设计如何在substrate中实现树形结构

### THANK YOU!
